

## FSB's Digital Refresh: Fast Balances

Fast Balances is the quickest way to view real-time balance information for your desired accounts without logging in to your mobile banking app. To establish Fast Balances after the Digital Refresh, log in to the mobile app and tap the menu in the upper-right corner of the screen. From there, select 'Settings', then select 'Fast Balances'.

Next, enter your device name (i.e., Mary's Phone) and enable Fast Balances on your device. Then, scroll down and check the boxes next to the accounts you'd like to access balance information for and click 'Submit'.

Once Fast Balances have been established, select 'Fast Balances' from the initial login screen to see balance information without entering your user credentials.
