

FSB's Digital Refresh: Setting Up Push Notifications

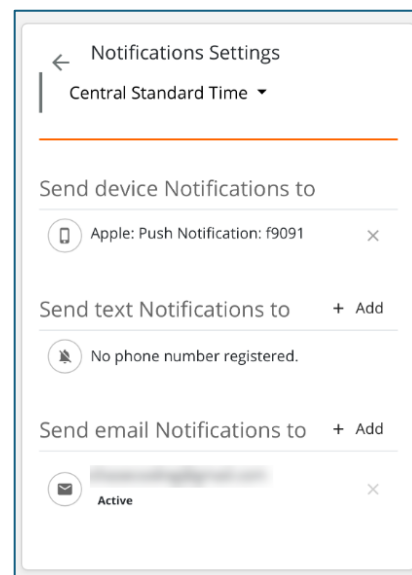

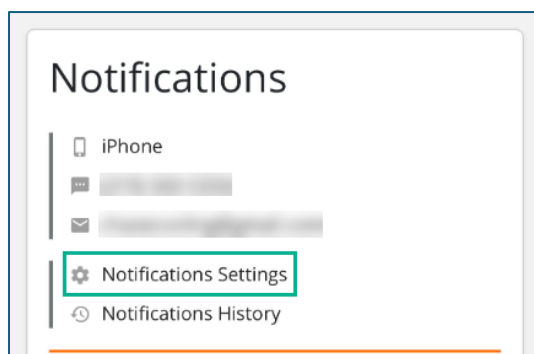

While previously established text and email alerts will be maintained throughout this Digital Refresh, app-specific push notifications must be re-established. After logging in, navigate to the menu in the upper right-hand corner of the screen where you'll select 'Settings', then 'Alerts'.

After you agree to the terms and conditions, a welcome screen highlighting the alerts you're automatically enrolled in will appear. These required alerts are specifically designed to keep you updated on changes to your personal information.

From here, you'll navigate to 'Notification Settings' to establish the three channels in which you can receive alerts: push notifications, text, and e-mail.

When you enroll in alerts from your mobile device, that device is automatically authenticated, granting access to re-establish any existing push notifications or elect new ones. The email address linked to your online banking account should already be available as an alert option. To establish text notifications, select the 'add' button from the 'Notifications Settings' screen and follow the prompts by entering your phone number and verifying the number with the 6-digit one-time passcode you'll receive.

Add an SMS contact

To get started, specify where you want to send Notifications to.
